

VS 320

Vacuum Soldering Systems

Technical Data::

Plate size:	320mm x 320mm
max. substrate height:	100mm
max. solder temperture:	450°C
Heat up / cool down:	max. 2,5K/s
max. load:	15kg
Possible process gases:	N2; N2H2 95/5% H2 bis 100%
Power supply:	400V / 32A
Cooling water:	10slm
Weight:	~ 300kg

Options:

- Formic acid gas line with bubbler
- Maximum of 5 gas lines
- Datalogging software
- Intitgrated plasma equipment
- High vacuum pump

The smallest and most powerful generation of vacuum soldering systems.
Made in Germany
